Dental plan features

Preventive Plus

On all dental plans, Preventive (Type 1) procedures are not deducted from the plan's annual maximum, saving the annual benefit for more expensive procedures.

Teeth whitening

PrimeStar Boost provides Major (Type 3) coverage toward professional teeth bleaching procedures, also known as whitening.

Child orthodontia benefit

PrimeStar Boost includes a lifetime orthodontia benefit for dependent children up to age 19.

Increasing coverage

To encourage persistency, most plans increase coverage and/or maximum benefits after the first year on the plan. The plan benefits will show day-one coverage, which applies the first day the plan is effective. After one year on the plan (except in Washington, which is by calendar year), benefit coverage may increase and stay at the higher level of coverage for subsequent years.

*Individuals 18+ and their dependents are eligible for coverage.

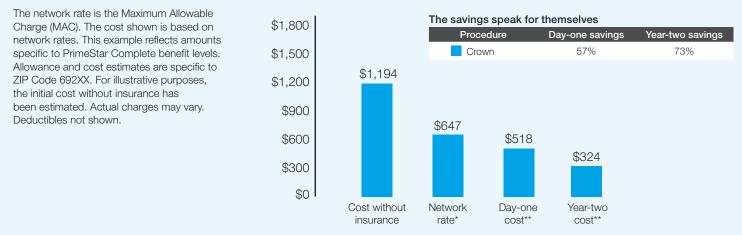

Dental Network

The Ameritas Dental Network is one of the nation's largest. Dentists in the Ameritas network have agreed to charge 25-50% less than their regular rates, which can lower out-of-pocket costs. Search Classic (PPO) network providers at ameritas.com – <u>Find a Health Provider</u>.

Savings example

Your clients save money on dental services with any dental provider. They can save even more on out-of-pocket costs when they visit an Ameritas Dental Network provider. Here is an example with the PrimeStar Complete plan.

*Maximum Allowable Charge

**Cost shown above is based on network rates and does not include deductibles.
